Discussion Details

Topic 1: Wireframe progress

Opened By: Marabel

Location: Zoom

Discussion Points:

Marabel asks the team if they have started or completed the wireframes. Gabriel responds that he has only completed the homepage. Henry, Ezra and Darma don't respond.

Gabriel responds 1 hour later on behalf of Ezra stating that Ezra's wireframes are in progress. Gabriel states that Ezra is unable to send messages in zoom.

Topic 2: Talking with Dr. Jacqueline

Opened By: Nil

Location: Zoom

Key Takeaways:

- Wireframe should focus more on navigation flow than interface design
- Wireframe should have a good mix of images and text
- Wireframe images should take note not to overload user's cognitive load
- Use bootstrap designs for layout
- Look at top 10 best and worst websites on Google for design ideas
- Figma is a good wireframe tool
- Website should look simple overall and should have information readily available upfront
- Teams may use user testing to try out different types of design

Topic 3: Food Recommendation Draft

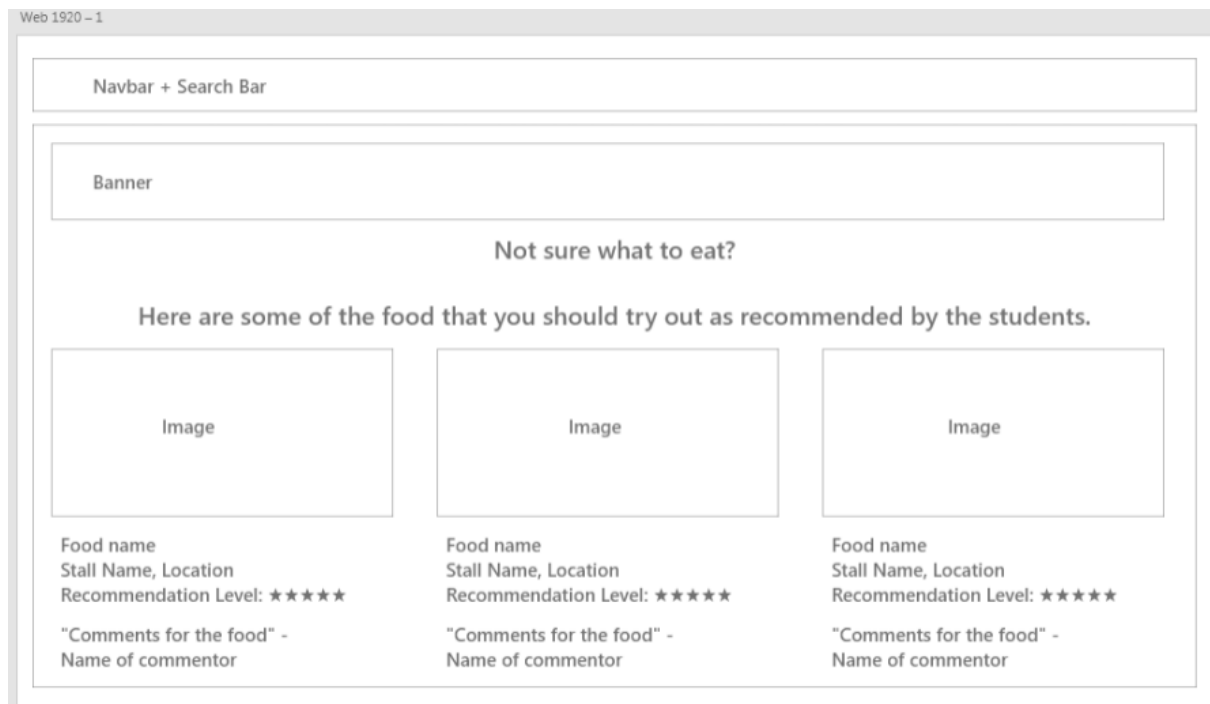

Opened By: Henry

Location: Discord

Discussion Points:

Henry sends a screen shot of his draft wireframe for food recommendation. Henry states that the design is subjected to future changes

Below is his screenshot:

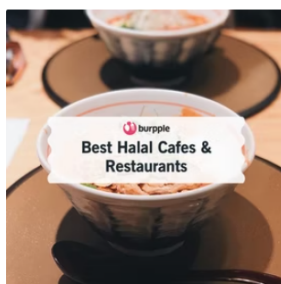

Marabel sends a screenshot of the burpple website and provides a suggestion for Henry to follow the format of text display in the screenshot. Henry notes this.

Below is Marabel's screenshot:

Marabel provides another suggestion for Henry: Instead of recommending specific food dishes, he may write a top 10 lists of good foods.

Henry notes that he will review that idea.

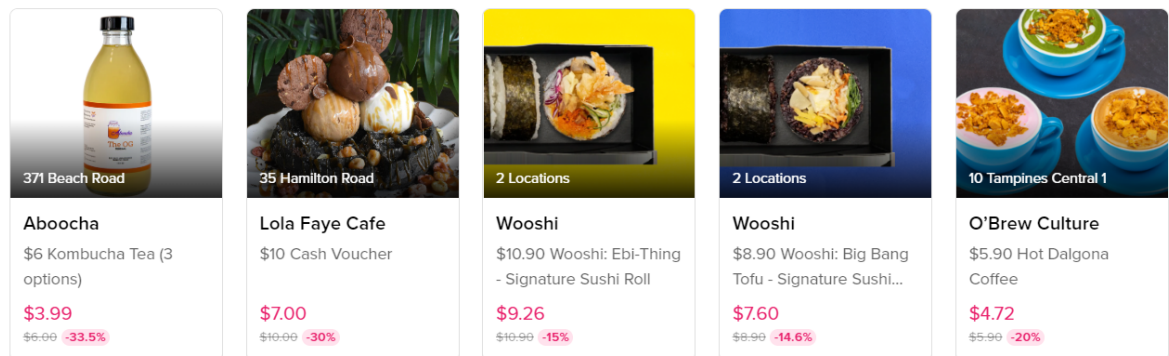

Marabel sends a screenshot as a suggestion for single food item view.
