Attendees

- Marabel
- Gabriel
- Darma

Discussion Details

Topic 1: Gantt Chart Evaluation

Opened By: Darma

Location: Discord

Discussion Points:

Darma sends a copy of his Gantt chart and asks for the team to check his work. Gabriel, Ezra and Marabel note this. Marabel states that she will check it later as she isn't available at the moment.

After 3 hours, Marabel provides the following suggestions for improvement for Darma (quoted word for word):

1. add task dependency
2. if possible categorise each task under a title header. Eg. Project Plan, Prototyping, Feedback etc
3. write more specific tasks.
Eg: pre-project plan -> who wrote which part of the project plan? Who created the document? who submitted the project plan.
Eg. Front page sketch -> who discussed the design? who create the which part of the design?etc
4. im pretty sure we arent coding this trimester so you can remove that portion

Topic 2: Task Clarification

Opened By: Gabriel and Marabel

Location: Discord

Discussion Points:

Gabriel and Marabel note that coding is excluded as a task in this module.

Darma asks if he needs to change his Gantt chart to reflect this. Marabel responds, "yes".

Darma reconfirms if coding is a project task as the project specifications state that a demo is needed. Marabel clarifies that the demo refers to a high fidelity prototype. Gabriel replies with a screenshot of a text conversation asking between him and an individual who has completed the module before. This screenshot clarifies that coding is not needed as a project task at the moment.
