### Topic 1 - Database Update Clarification

**Timestamp: 3 October 9:47am**

**Location: Discord**

**Opened By: Darma**

#### **Discussion:**

Darma states that he updated the database and asks the team if they are able to see the update.

Darma states that he does not know if the database is at his device or at Visual Studio.

No response was given.

### Topic 2 - Database Update & Version Control Clarifications

**Timestamp: 4 October 4:16pm**

**Location: Discord**

**Opened By: Marabel**

#### **Discussion:**

Marabel asks Darma where he has updated the database and if his issue has been resolved. Darma asks Marabel if she knows how to update the database to Visual studio as the database is only reflected in his machine but not the Visual Studio folder.

Marabel asks if Visual Studio has been connected to the database. Darma responds that he thinks it is connected at his machine at the server explorer.

Marabel states that if the data can be retrieved from Visual Studio then it should be fine. Marabel also states that from her experience, she does not think it displays at Visual Studio. Marabel thinks that the tables etc have to be viewed on SSMS itself and Visual Studio is for writing and viewing code only.

Darma asks if he needs to export the database to another folder or if he can use azure to save the database. Marabel states that if he wants to export the database for version control, the best is to convert it into CREATE and INSERT scripts. Marabel states that she is not sure about the process of exporting to a folder.

Darma asks Marabel if she is able to see the database in server explorer in the latest project files. Marabel states that she is not able to as she is currently travelling to school.

Marabel pings everyone and asks if they can help provide suggestions for Darma to resolve the issue. No response was given.

Darma sends the CREATE script file for the database for other members who may know how to do it.

## **Topic 3 - New GitHub & Clarifications**

**Timestamp: 9 October 2022 11:03pm**

**Location: WhatsApp**

**Opened By: Gabriel**

### **Discussion:**

Gabriel apologizes to the team and asks the team to accept his GitHub invitation. Gabriel pings Marabel, Ezra and Darma.

Gabriel states that he failed to update in the original repository so he uploaded his codes into a new repository.

Darma asks Gabriel if he has received his acceptance notice. Gabriel responds okay and states that Marabel has also accepted.

Ezra acknowledges Gabriel's request.

Marabel asks Gabriel if he transferred the pages from the old repository to the new repository. Gabriel states no but his GitHub is the updated version. Gabriel states that it is hard to explain but he will explain it on Thursday (13 October).

Marabel asks Gabriel if she is suppose to redo all her pages. Gabriel states that it is just his part.

Marabel asks Gabriel how the team is going to integrate their webpages. Gabriel asks if Marabel has posted something in his old repository. Marabel responds no and states that she is just asking about integration. Gabriel clarifies if he means putting the webpages together. Marabel states yes.

Gabriel asks Marabel if she will be coming for class tomorrow as he thinks he can integrate it tomorrow. Marabel states that she is not coming for class tomorrow.

Marabel asks Gabriel for a rough idea of how he is going to integrate the webpages. Gabriel states that he thinks he will take Marabel's code from her repository and paste it into his webform. Gabriel states that he has not done it since his is not totally finished.

Gabriel asks Marabel if that is a good idea. Marabel notes this and states that Gabriel just needs to make sure the pages load as intended.
