Discussion Details

Topic 1: Master page change

Opened By: Gabriel

Location: Zoom

Discussion Points:

Gabriel informs the team that the master page will go through some changes such as the colour scheme and minor design change.

Topic 2: Colour Scheme Change

Opened By: Darma

Location: Zoom

Discussion Points:

Darma asks the team if the colour scheme should be changed to red and white

Darma then asks Gabriel about who should edit the code to reflect the change.

Darma then asks if the footer should be changed to black or grey.

Gabriel responds to Darma in their native language

Topic 3: Folder Management

Opened By: Darma

Location: Zoom

Discussion Points:

Darma asks the team if the web pages should be under the user folder.

Darma states that it is because the picture location will be different so he will need to change the master page

Topic 4: Footer Changes

Opened By: Darma

Location: Discord

Discussion Points:

Darma sends a screenshot of his current footer design. Darma asks the team if they want to make the navigation bar move when it scrolls.

Gabriel asks Darma if he can show an example of this. Darma sends this link as the example: https://online.hbs.edu/

Darma then sends 4 more screenshots of different footer designs. Darma asks if his current footer design is ok. Gabriel responds that it is ok.

Darma states that if the team wants to use the nav bar that they will need to edit their webforms to include around 50px of space at the top so that the content will start under the navigation

Gabriel clarifies if Darma is referring to padding top. Darma responds yes. Gabriel states that the team will do that.

Darma notes that he will upload the new nav bar to GitHub.

Topic 5: Master page pathing

Opened By: Darma

Location: Discord

Discussion Points:

Gabriel asks Darma where the master page is in the code folder. Darma responds that it is under the user folder as the master page cannot load its images otherwise. Marabel states that she doesn't think the master page needs to be in the user file because it probably has to do with the image file pathing.

Darma states that because of the file pathing, the images on the master page cannot be opened. However when the master page is moved it loads.

Marabel states that it is because the image tag does not have a runat="server". Marabel states that she will update the codes again and re commit to GitHub.

Topic 6: Website design suggestions

Opened By: Ezra

Location: Discord

Discussion Points:

Ezra suggests using #1c1c1c as the colour for the footer.

Ezra also suggests adding padding top 50 because of the content cut

Darma clarifies if #1c1c1c is for the footer background or for text. No response was received.

Darma states that he has updated the padding and footer designs.

Topic 7: File Location

Opened By: Marabel

Location: Discord

Discussion Points:

Marabel asks Darma whether he prefers to move the About page into another folder or kept outside.

Ezra suggests putting it outside.

Darma suggests putting the master page outside.

Marabel states that the changes has been updated.

Topic 8: CSS Clarification

Opened By: Ezra

Location: Zoom

Discussion Points:

Ezra asks Marabel if inline CSS is fine for the project. Marabel responds that inline is fine.

Ezra asks if the responsive CSS needs to be written in a separate CSS file. Marabel gives an example of responsive CSS. Marabel states that it is usually written inline.

Marabel states that for CSS to use the method that is more comfortable for the team.

Marabel states that the CSS folder in the project was created in case the team ends up having a lot of CSS files. The CSS folder can be removed if it is not used by the team.
